

## Google Cardboard

TABLE THREE – Program and Service Trends in Libraries

### Using Google Cardboard

1. Find a seat. You might be inclined to walk around while using Google Cardboard glasses without considering the furniture in the physical room you are using the device in.
2. Follow the directions on your Google Cardboard to fold the cardboard into your glasses.
3. Using any smartphone, download the free [Google Cardboard app](#).
4. Open the Google Cardboard app.
5. When prompted, scan the QR code on your Google Cardboard glasses.
6. Insert your phone into the phone slot in the back of the Google Cardboard glasses.
7. Look into the eyeholes and enjoy!

### In need of more VR content?

1. Check out the [Virtual Reality Channel](#) on YouTube.
2. Browse your resource packet for VR content sources.
